

# MSX

## Compact speakers and subwoofers

MSX is a compact speaker system designed for real rooms and modern living. Small enough to blend in, capable enough to surprise, it delivers true separation with a scale and openness that feels far bigger than its size suggests.

MSX isn't a single-box compromise. It isn't tied to a closed ecosystem. MSX is a proper hi-fi loudspeaker — modular from day one — giving you the freedom to start simply and expand when you're ready. Stereo first. Subwoofer optional. Surround if you want it. Always discreet. Always considered.

### Demonstration Tracks

At Cambridge Audio we use our ears constantly, both as passionate music lovers and audio professionals looking for test examples. We test our products with all types of content and the following suggestions are our picks for a great demo experience for your customers.

**Ray LaMontagne**  
Yearning  
(1924)

Try something intimate and spacious. A simple vocal recording — acoustic guitar, natural sense of place, a lead vocal voice placed clearly between the speakers. Notice how the sound detaches from the speakers as the arrangement builds, filling the room — not just the positions of the two boxes.

**Jordan Rakei**  
Freedom  
(2024)

Then move to something more modern. Clean, rhythmic, layered production especially those backing vocals. Listen for scale. For control as the layers develop. For how evenly the sound spreads across the room — not locked to one seat.

**MSX10**  
Compact. Capable. Flexible.

- 1 × 4th Gen BMR driver
- Ideal for smaller rooms and apartments
- True stereo separation in a minimal footprint
- Wide dispersion from a single BMR driver for even coverage
- Wall-mountable for discreet installation
- Perfect entry into a modular system

**MSX20**  
More scale. More output.

- 2 × 4th Gen BMR drivers
- Greater dynamic headroom
- Suited to medium rooms
- Wider soundstage and stronger bass presence from dual BMR drivers
- Works beautifully as stereo or surround
- Still compact and easy to place

**MSX Sub 200**  
Compact bass extension.

- Designed for smaller spaces
- Tight, controlled low frequencies to 36 Hz
- Easy to integrate
- Compact cabinet
- Ideal partner for MSX10

**MSX Sub 300**  
More depth. More authority.

- Greater power and impact
- Low frequencies to 31 Hz
- Capable of proper home cinema LFE duties
- Ideal for larger rooms
- Designed to scale with MSX20 systems
- Can be used with AV receivers, even multiple units

## The technology — simple, effective

### BMR Drivers

MSX uses our 4th generation Balanced Mode Radiator (BMR) drive units to deliver unusually wide dispersion. Instead of projecting sound in a narrow beam, the sound spreads evenly across the room. The result is a presentation that feels detached from the speakers themselves — immersive, natural and consistent wherever you sit.

### Subwoofer Options

Both subwoofers are designed to integrate seamlessly with MSX.

The Sub 200 with its 200W digital amplification, advanced DSP, 6.5" woofer and dual 6.5" passive radiators, adds weight and depth in compact spaces. The Sub 300 with its 300W digital amplification, advanced DSP, 8" driver and passive radiator brings greater authority and would even suit a full home cinema systems. Subwoofers are optional, add one when you need more scale — not before.

---

## Start with stereo

MSX begins as a single speaker (MSX10 or MSX20) but comes alive as a proper two-speaker system. Real left/right separation. Real imaging. No processing tricks.

Compact enough to suit modern interiors, but engineered to fill the room with balanced, comfortable sound. Add a subwoofer if you want more depth and impact — the system grows with you.

---

## Expand when you're ready

Because MSX is modular, upgrading means adding — not replacing.

Add a subwoofer for greater scale. Add more MSX speakers and keep going to 5.1 or 7.1. Use MSX as discreet side or rear channels in systems with larger floorstanders at the front.

MSX works with Cambridge Audio amplifiers — and with other hi-fi amplifiers or AV receivers.

There's no closed ecosystem, no lock-in. Just flexible system building.

---

## Designed to disappear

Visually, MSX is ultra-compact, available in black or white, and easy to wall-mount.

Sonically, wide BMR dispersion means the sound feels like it fills the space — not fires from two visible boxes.

The result is something rare: Speakers you barely notice. Sound you absolutely do.

# MSX10

<b>Driver</b> 1 x 2.25" Full-Range BMR	<b>Sensitivity (spl)</b> 86dB (2.83 Vrms input)	<b>Frequency response</b> 150Hz-20kHz	<b>Impedance</b> 8 Ohms
<b>Recommended amp power</b> 25 - 200W	<b>Dimensions (w x h x d)</b> 79c x 79 x 97mm (3.1 x 3.1 x 3.8")	<b>Weight</b> 0.43kg (0.95lbs)	<b>Finishes</b> Matte Black, Matte White
<b>What's in the box?</b> 1x speaker, 1 x Wall bracket, Rubber Feet, Quick Start Guide, and Registration card			

# MSX20

<b>Driver</b> 2 x 2.25" Full-Range BMR (1 x mid-bass, 1 x bass)	<b>Sensitivity (spl)</b> 88dB (2.83 Vrms input)	<b>Frequency response</b> 120Hz-20kHz	<b>Impedance</b> 8 Ohms
<b>Recommended amp power</b> 25 - 200W	<b>Dimensions (w x h x d)</b> 79 x 155 x 97mm (3.1 x 6.1 x 3.8")	<b>Weight</b> 0.75kg (1.65lbs)	<b>Finishes</b> Matte Black, Matte White
